Courses shown in boldface above must be passed with a grade "C" or better. A "D" is only acceptable in the courses not in boldface. Also, a JUDGH RI ³ & ' LV QRUPDOO\ UHTXLUHG LQ DOO SUHOLDSHV (Except for L&T) in which a grade of D may be taken. Students with a grade of D may take an ECSE course that has it as a prerequisite, provided that the failed course is re-taken at the same time. Students thinking of doing this should meet with a departmental advisor.)

Students with prior programming experience can replace COMP 202 with COMP 250 upon receiving permission from the department.

Technical Complementary courses are selected from the list given on the next page.

The Lab Complementary course is normally taken in conjunction with a technical complementary. The courses ECSE 426 - Microprocessor Systems, ECSE 431 - Intro. to VLSI CAD, ECSE 435 - Mixed Signal Test Techniques, ECSE 436 - Signal Processing Hardware and ECSE 450 - Electromagnetic Compatibility, can be taken as a technical complementary or a lab complementary. If taken as a lab, they are still 3 credit courses.
